

Idaho Power’s Clean Energy Your Way – Flexible Option Product Content Label

This label is part of our Green-e® Energy certification and is provided to participants each year. The label shows the anticipated renewable energy sources for this year and the actual sources for last year.

The Clean Energy Your Way – Flexible Option’s renewable energy comes from 100% Green-e® Energy certified new¹ renewables. The following shows the Clean Energy Your Way – Flexible Option’s historical and perspective energy resource mix and generation facilities’ locations:

2023 Historical² (Actual) Supply:

95% Wind and 5% Solar from Idaho and Oregon facilities

2024 Prospective³ (Planned) Supply:

95% Wind and 5% Solar from Idaho, Oregon or Washington facilities

1. New Renewables come from generation facilities that first began commercial operation within the past 15 years.
2. Historical figures reflect the actual renewables provided to Clean Energy Your Way-Flexible Option customers last year.
3. Prospective figures reflect the renewables that we plan to provide for the current year, but actuals may vary based on resource supply. The current year’s actual figures will be reported by August next year in the Historical Supply line.

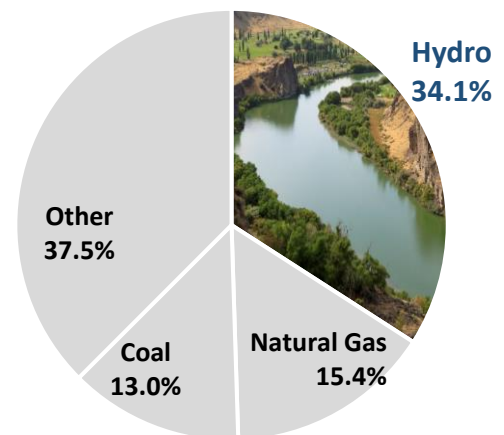

How does the Clean Energy Your Way – Flexible Option compare to the standard energy mix?

Idaho Power’s 2023 mix of resources supplying Idaho Power customers included: Hydroelectric (34.1%), Coal (13.0%), Natural Gas (15.4%) and Other (37.5%).

How is the Clean Energy Your Way – Flexible Option sold?

It is sold in blocks of 100 kilowatt-hours (kWh) or matches 100% of your energy (kWh) use.

As of 2023, the average home in Idaho Power’s service area uses 950 kWh per month. For the average home, the 100% Option would add an average \$9.50 to the monthly bill to use 100% renewable energy. As an example of the Block Option, the home could use 5 Blocks of renewable energy to cover over half of the home’s energy use for an extra \$5.00 each month.

The Clean Energy your Way – Flexible Option’s renewable energy is Green-e® Energy certified and meets the environmental and consumer-protection standards set forth by the nonprofit Center for Resource Solutions. Learn more at green-e.org.
