

GreenPower PROGRAM

Idaho Power's Green Power Product Content Label

This label is part of our Green-e® Energy certification and is provided to participants each year. The label shows actual sources of Green Power purchased in 2020. For a complete list of all sources in 2020, visit idahopower.com/greenpower.

2020 Historical Product Content Label¹

100% Green-e® Energy Certified New² Renewables

Generation facilities' location:	Idaho and Oregon
Energy Resource Mix:	50% Solar, 50% Wind

1. These figures reflect the renewables that we provided to Idaho Power's Green Power customers in 2020.
2. New Renewables come from generation facilities that first began commercial operation within the past 15 years.

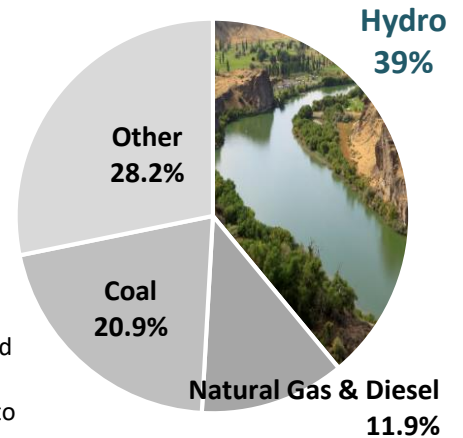

How does Green Power compare to the standard energy mix?

Idaho Power's 2020 mix of resources supplying Idaho Power customers included: Hydroelectric (39%), *Other* (28.2%), Coal (20.9%), and Natural Gas & Diesel (11.9%).

How is green power sold?

Green Power is sold in blocks of 100 kilowatt-hours (kWh) or matches 100 percent of your energy (kWh) use.

The average home in Idaho Power's service area uses about 950 kWh per month (Idaho Power 2019). For the average home, the 100% Option would add an average \$9.50 to the monthly bill to use 100 percent renewable energy. As an example of the Block Option, the home could use 5 Blocks of green power to cover over half of the home's energy use for an extra \$5.00 each month.

Energy
CERTIFIED

Green Power is Green-e® Energy certified and meets the environmental and consumer-protection standards set forth by the nonprofit Center for Resource Solutions. Learn more at green-e.org.
