

## Attestation for Demonstration of Site Control

Idaho Power Company  
Attn: Generation Interconnection—BCW  
1221 W Idaho St.  
Boise, ID 83702

As an authorized officer, agent, or representative of \_\_\_\_\_, I hereby attest that all Site Control submitted associated with the generator Interconnection Request, known under the project name \_\_\_\_\_, for a total \_\_\_\_\_ MW of proposed generation in \_\_\_\_\_ County(ies), \_\_\_\_\_ (State) meets the demonstration of exclusive Site Control requirements for initiating an Interconnection Request in section 1 of the Idaho Power Generation Interconnection Business Practices (GI BP) or continuation of Site Control per Section 11.3 of Idaho Power’s Large Generator Interconnection Procedures (LGIP).

I further attest that the total sum of all acreage under legal description represents \_\_\_\_\_ total acres. This amount is of sufficient land to site the size and fuel type of the generating facility pursuant to Idaho Power’s posted acreage requirements in section 1.4 of the GI BPs, and thereby satisfies all requirements under IPC Business Practices Site Control requirements.

I further understand that Site Control will be considered deficient, as a result of any documentation audit, and could result in withdrawal of the Interconnection Request should certain conditions exist, including, but not limited to, the following:

- Insufficient acreage demonstrated to cover minimum requirements outlined in section 1.4 of Idaho Power’s GI BPs and/or insufficient documentation demonstrating a variation from the acreage requirements described in section 1.4.2 of Idaho Power’s GI BPs
- Site Control is determined to not meet the exclusivity requirements as discussed in section 1.3 of the Idaho Power’s GI BPs (e.g., another entity shares the right to use the site for the same purpose or another interconnection request submitted site control sharing the some or all of the site)
- Date of Site Control documentation expires before proposed In-Service Date
- Documentation for Site Control is not legally binding (e.g., not notarized, signatories incomplete)
- Site Control property description is not aligned with generating facility layout (where applicable)
