HEATING AND COOLING EFFICIENCY PROGRAM

DUCTED CENTRAL AIR CONDITIONER SPECIFICATION

Residential customers receive the Idaho Power incentive for having a qualified ducted central air conditioner installed into their existing or new construction single family site built, manufactured, duplex, triplex, fourplex home. The incentive is available to customers who are homeowners, builders, or property owners. The work must be performed by an HVAC licensed contractor. The customer will process and submit the necessary incentive forms. Customers receiving this incentive may not receive incentives for the same equipment under another Idaho Power incentive program. One incentive per residence is available.

PROGRAM REQUIREMENTS

General

The Idaho Power incentive is available for the installation of a ducted central air conditioner. Heat pumps do not qualify.

Qualified homes include existing homes and new construction.

Qualified homes include single family site built, manufactured, duplex, triplex, fourplex.

Home can be a primary residence, vacation home or rental.

No minimum length of residency.

Obtain AHRI Certified Reference Number from your contractor for SEER/SEER2 and EER/EER2 verification. Enter number into www.ahridirectory.org and print the PDF Certificate of Product Ratings.

Equipment and incentives

Ducted central air conditioner meets the following Seasonal Energy Efficiency Ratio (SEER) and Energy Efficiency Ratio (EER) criteria for the incentive the customer is applying for, as determined by the Air Conditioning, Heating and Refrigeration Institute (AHRI) Standard 210/240.

Existing Home

Incentive amount	New system SEER/SEER2	New system EER/EER2
\$50	Minimum 15 SEER/14.2 SEER2 but less than 17 SEER/16.3 SEER2	Minimum 12 EER/11.5 EER2
\$150	Minimum 17 SEER/16.3 SEER2	Minimum 13 EER/12.5 EER2

New Construction

Incentive amount	New system SEER/SEER2	New System EER/EER2
\$50	Minimum 15 SEER/14.2 SEER2 but less than 17 SEER/16.3 SEER2	Minimum 12 EER/11.5 EER2
\$150	Minimum 17 SEER/16.3 SEER2	Minimum 13 EER/12.5 EER2

- Ducted central air conditioner is AHRI-rated with matching condensing unit and evaporator coil as listed on AHRI's Directory of Certified Product Performance found at: www.ahridirectory.org.
- Ducted central air conditioner is 5 tons or less
- Ducted central air conditioner has a single or two stage/speed compressor. Variable speed compressors do not qualify.
- Ducted central air conditioner must be sized, installed, programmed, and tested by the licensed HVAC contractor after installation to verify the system is operating correctly. Ducts must be inspected and repaired as needed.
- If a combustion appliance is present in the home or attached garage, homeowner must ensure an approved working carbon monoxide (CO) detector is in the home.

CUSTOMER AGREES TO THE FOLLOWING:

The customer will have the HVAC licensed contractor performing the work maintain the appropriate license(s) and adhere to the requirements within the state where work is performed. The contractor shall install the equipment and/or perform services in accordance with all applicable federal, state, and local applicable safety, building, environmental, and other applicable statutes, regulations, ordinances, codes, and accepted industry standards. In the event the contractor contracts or delegates work to be performed by others, the contractor shall be responsible for the acts and omissions of any such work.

The customer is responsible for having the contractor install the equipment consistent with manufacturer instructions.

Idaho Power is under no obligation to pay the contractor any amount of money.

Customer shall indemnify, hold harmless, reimburse, and defend Idaho Power from, for, and against any actual or alleged claims, demands, damages, losses, expenses, and liabilities from third parties (collectively "Claims") relating to or arising from contractor's work or work the contractor has performed by others, provided the claims are not the result of bodily injury to persons or damage to property caused exclusively by the sole negligence of Idaho Power.

Customer acknowledges and agrees that Idaho Power offers no warranties of any kind whatsoever related to this program.

Idaho Power does not endorse contractor's services, products, reputation, or reliability.

Neither the program nor the contractor's work shall create any employment or agency relationship between the contractor and Idaho Power, and nothing shall be construed or interpreted to place any obligation on Idaho Power to pay the contractor any amount as a result of contractor participation in or expressly referenced in the program.

In no event shall the homeowner bring an action against Idaho Power, nor shall Idaho Power be liable to homeowner for, any direct, indirect, special, incidental, or consequential damages of any nature or kind, whether in contract, warranty, tort, negligence, strict liability, or otherwise, arising out of or resulting from the program or any terms and conditions of the program.
