^{*}Duct sealing requires Participating Contractor. See Idaho Power website for listing. www.idahopower.com/heatingcooling

Heating and Cooling Efficiency Program

TERMS & CONDITIONS

Customer Information and Agreement

Incentive Availability: Incentive qualifications and amounts are subject to change or termination at any time. Incentives offered by Idaho Power Company (Idaho Power) in the Heating and Cooling Efficiency Program (Program) will be processed on a first-come, first-served basis. Incentive qualifications are found on the incentive applications and worksheets on line at www.ldahoPower.com/heatingcooling.

NOTE: Certain incentives must be performed by an authorized contractor (Participating Contractor). Participating Contractors and additional program information can be found at www.ldahoPower.com/heatingcooling. Program continuation, eligibility requirements and terms and conditions apply.

Qualifying Applicants: Residential customers (Customer) of Idaho Power in Idaho and Oregon may qualify, depending on the measure, as well as property owners and managers of rental properties, and builders, served by Idaho Power. The incentives contained in the Heating and Cooling Efficiency Program are not retroactive. The incentive(s) must be part of the applicant's decision process to purchase a qualified product or service in order to qualify for the respective incentives

Qualifying Equipment: All equipment/materials must be new and purchased and installed prior to submitting incentive paperwork.

Application and Worksheet Details: Application and worksheet submittals must include all information requested. Failure to provide this information may result in the delay or denial of the incentive. Idaho Power reserves the right to conduct random on-site inspections to verify information provided on the application. Incentive paperwork must be submitted within 90 days after project completion. Incentive amount not to exceed the price paid for the equipment and installation.

Idaho Power issues incentives in the form of checks and not utility bill credits. Idaho Power is not responsible if Participating Contractor or Licensed Contract or, who provides and installs the equipment, provides inaccurate information about the amount and/or conditions of the actual incentive. Idaho Power will not pay incentives for equipment that is mislabeled or misrepresented regarding incentive qualifications. Customer receiving incentives under the Program may not receive incentives for the same equipment under another Idaho Power program. Incentive amount not to exceed the price paid for the equipment and installation. Customer is responsible for complying with all applicable codes and regulations.

Incentive Limitations and Limitation of Damages: Payment of any

incentive by Idaho Power does not guarantee the performance of qualifying measures and does not guarantee that the qualifying efficiency measures will deliver any specified amount of energy or cost savings. Customer shall independently evaluate any information related to the qualifying measure.

Neither Idaho Power, its parent company, affiliates, subsidiaries, directors, officers, employees, agents, representatives, successors and assigns, nor its contractors make any warranty, expressed or implied, or assume any liability or responsibility for the accuracy, completeness or usefulness of any information, estimated savings, benefits, products or processes, or service by trade name, trademark, manufacturer, or otherwise does not necessarily constitute or imply its endorsement, recommendation, or favoring by Idaho Power, its parent company, affiliates, subsidiaries, officers, employees, or its contractors.

Idaho Power makes no representation of warranty, and assumes no liability with respect to the quality, safety, performance, or other aspect of any design, system or appliance installed pursuant to the Program, and expressly disclaims any such representation, warranty or liability. Customer agrees to indemnify, defend, reimburse and hold harmless Idaho Power its parent company, affiliates, subsidiaries, directors, officers, employees, agents, representatives, successors and assigns of each, from, for and against any claims, demands, losses, damages, expense, and liabilities of any kind incurred by third parties arising out of, or relating to any measures installed.

Incentive Qualifications

Visit www.ldahoPower.com/heatingcooling for additional requirements.

Ducted Air Source Heat Pump - Existing Homes and New Construction:

Qualifying existing home systems include electric forced air, oil or propane forced air, electric baseboard, electric ceiling cable, or electric wall units. There is a maximum of two incentives for two systems per home.

Qualifying homes include single-family site built, manufactured, duplex, triplex, or fourplex. They can be a primary residence, vacation home, or rental. If new construction or if the home is existing and the system being replaced is oil or propane forced-air furnace, natural gas cannot be available. If an electric system is being replaced, any supplemental heat in the new heat pump must be electric.

<u>Ductless Air Source Heat Pump - Existing Homes</u>: Qualifying existing home systems include electric baseboard, electric ceiling cable, or electric wall units. There is a maximum of one incentive per home. Qualifying homes include single-family site built, manufactured, duplex, triplex, or fourplex. They can be a primary residence, vacation home, or rental

Ducted Water Source Heat Pump - Existing Homes and New Construction:

Qualifying existing home systems include air source heat pump, electric forced air, oil or propane forced air, electric baseboard, electric ceiling cable, or electric wall units. There is a maximum of one incentive per home.

Qualifying homes include single-family site built, manufactured, duplex, triplex, and fourplex. They can be a primary residence, vacation home, or rental. If new construction or if the home is existing and the system being replaced is oil or propane forced air furnace, natural gas cannot be available. If an electric system is being replaced any supplemental heat in the new heat pump must be electric.

DUCTED GROUND SOURCE HEAT PUMP — EXISTING HOMES AND NEW CONSTRUCTION:

Qualifying existing home systems include air source heat pump, electric forced air, oil or propane forced air, electric baseboards or ceiling cable or wall units.

There is a maximum of one incentive per home.

Qualifying homes include single-family site built, manufactured, duplex, triplex, or fourplex. They can be a primary residence, vacation home or rental. If new construction or if the home is existing and the system being replaced is oil or propane forced air furnace, natural gas cannot be available.

DUCTED CENTRAL AIR CONDITIONER – EXISTING HOMES AND NEW CONSTRUCTION:

There is a maximum of one incentive per home.

Qualifying homes include single-family site built, manufactured, duplex, triplex, or fourplex. They can be a primary residence, vacation home or rental.

<u>Evaporative Cooler - Existing Homes</u>: The minimum airflow rating is 2,500 cubic feet per minute (CFM). There is a maximum of one incentive per home. Qualified homes include single-family site built, manufactured home, duplex, triplex, or fourplex. They can be a primary residence, vacation home or rental.

<u>Duct Sealing - Existing Homes</u>: There is a maximum of one incentive per home. Homes must have electric forced-air heat (with or without central air conditioning) or a heat pump. Qualified homes include single-family site built, manufactured home, duplex, triplex, or fourplex. They can be a primary residence, vacation home or rental.

<u>Residential Whole House Fan - Existing Homes:</u> There is a maximum of one incentive per home. Qualifying homes include homes with central air conditioning, zonal cooling or a heat pump. The home must be single-family built site built and can be a primary residence, vacation home or rental.

Electronically Commutated Air Handler Motor - Existing Homes: There is a maximum of one incentive per home. Qualifying heating systems (with or without central air conditioning) include electric resistance forced air heat, and oil or propane or natural gas forced-air heat. Heat pumps also qualify. Home must be single-family site built, manufactured, duplex, triplex, or fourplex. They can be a primary residence, vacation home or

<u>Smart Thermostat-Existing Homes</u>: There is a maximum of one incentive per home. Homes must have electric forced air heat (with or without central air conditioning) or a heat pump. Homes must be single-family site built, manufactured, duplex, triplex, or fourplex. They can be a primary residence, vacation homes and rentals.

Heat Pump Water Heater Existing- Homes and New Construction: Existing homes must be replacing an existing electric storage water heater.

There is a maximum of one incentive per home.

Qualifying homes include single-family site built, manufactured, duplex, triplex, or fourplex. They can be a primary residence, vacation home or rental. If new construction, natural gas cannot be available.
