

Idaho Power Commercial and Industrial Energy Efficiency Training

Oct. 5, 2026 – 10:30 a.m. to 2 p.m.

Hampton Inn and Suites – Meridian

875 S Allen Street, Meridian, ID 83642

Free for Idaho Power customers. Join Idaho Power's Commercial and Industrial Energy Efficiency team for a comprehensive overview of the energy efficiency and demand response programs available to commercial and industrial customers. Whether you're planning a retrofit project, designing a new facility, exploring custom project opportunities, or looking for ways to better manage energy costs, this training will provide practical information and resources to help you maximize savings.

During this training, attendees will learn about Idaho Power's updated commercial and industrial energy efficiency programs, including recent updates to retrofit, new construction, and multifamily incentives. Attendees will also learn about custom project incentives, energy management opportunities, the demand response program, and our new Midstream Program. **Lunch and program materials will be provided.**

Key Learning Objectives

- Understand Idaho Power's Commercial and Industrial Energy Efficiency Program offerings
- Learn about the 2026 updates to the retrofit, new construction, multifamily, and midstream programs
- Discover custom project and energy management incentive options
- Explore demand response (Flex Peak) opportunities and customer benefits
- Review energy-saving strategies for motors, pumps, fans, compressed air, HVAC, and refrigeration systems
- Examine real-world customer case studies and project success stories
- Gain a better understanding of commercial and industrial electric bills and rate structures

Who Should Attend?

- Facility managers
- Maintenance technicians
- Energy managers and plant operators
- Engineers
- Production supervisors
- Operations managers
- Building owners
- Commercial and industrial business customers
- Property managers and developers

Registration
