

SCHEDULE 72
HEATING AND COOLING
EFFICIENCY PROGRAM

AVAILABILITY

Service under this schedule is available to residential Customers and owners or managers of rental properties throughout the Company's service area within the State of Oregon that are served under a residential electric service schedule. This schedule is also available to home builders and developers who construct homes in the Company's service area within the State of Oregon that take service under a residential electric service schedule upon completion.

PROGRAM DESCRIPTION

The Heating and Cooling Efficiency Program provides incentives for the installation of qualified heating and cooling equipment and for having energy saving services performed.

INCENTIVE STRUCTURE

To be eligible for an incentive on an air source and open loop water source heat pump or duct sealing, the equipment installation/service must be performed by an Idaho Power authorized participating contractor who has received program training and has signed an agreement with the Company. Eligibility for an incentive for evaporative coolers, smart thermostats, or heat pump water heaters does not require a contractor. To be eligible for an incentive for the electronically commutated air handler motor ("ECM") or the residential whole house fan, a licensed contractor must perform the equipment installation. To be eligible for an incentive for a central air conditioner or ground source heat pump, a licensed HVA contract must perform the equipment installation. Equipment and services must meet the requirements of the Heating and Cooling Efficiency Program as outlined on Idaho Power's website.
