HEAT PUMP INCENTIVES for Existing Homes and New Construction

New Construction Homes

- New System Installed:** Air Source Heat Pump: Minimum 8.5 Heating Seasonal Performance Factor (HSPF) \$400 Quantity of 2 systems installed (maximum of 2)
 Open Loop Water Source Heat Pump: Minimum 3.5 Coefficient Of Performance (COP) \$1000
- Documentation to submit:** Copy of Paid Invoice (Invoice must include description of service, costs and installation dates) Heat Pump Worksheet
 Heating and Cooling Efficiency Program Incentive Application Sizing Worksheet

Existing Homes

New Air Source Heat Pump: Minimum 8.5 Heating Seasonal Performance Factor (HSPF) Quantity of 2 systems Installed (maximum of 2)

- Select Previous/Existing System:** Air Source Heat Pump \$250 Electric forced air, electric baseboards or ceiling cable or wall units \$800
 Oil / Propane forced air \$400
- Documentation To Submit:** Copy of Paid Invoice (Invoice must include description of service, costs and installation dates) Heat Pump Worksheet
 Heating and Cooling Efficiency Program Incentive Application Sizing Worksheet

New Open Loop Water Source Heat Pump: Minimum 3.5 Coefficient Of Performance (COP)

- Select Previous/Existing System:** Air Source Heat Pump \$500 Oil/Propane forced air \$1000
 Electric forced air, electric baseboards or ceiling cable or wall units \$1000
- Documentation To Submit:** Copy of Paid Invoice (Invoice must include description of service, costs and installation dates) Heat Pump Worksheet
 Heating and Cooling Efficiency Program Incentive Application Sizing Worksheet

New Ductless Heat Pump

Electric baseboards or ceiling cable or wall units \$750

- Documentation To Submit:** Copy of Paid Invoice (Invoice must include description of service, costs and installation dates) Ductless Heat Pump Worksheet
 Heating and Cooling Efficiency Program Incentive Application

Evaporative Cooler Incentive for Existing Homes (One Incentive Per Household)

Evaporative Cooler, Minimum 2500 Cubic Feet Per Minute (CFM) airflow system installed \$150

Home Type: Single Family Site Built Home Manufactured Duplex, Triplex, Fourplex

Documentation Copy of Paid Invoice (Invoice must include description of service, costs and installation dates)

To Submit: Heating and Cooling Efficiency Program Incentive Application

Manufacturer	Model trade name
Serial number	CFM

Other Incentives for Existing Homes

Incentive Type: Duct Sealing \$350 Whole House Fan \$200 Heat Pump Water Heater \$300

Smart Thermostat \$75 Electronically Commutated Air Handler Motor (ECM) \$50

Documentation Copy of Paid Invoice (Invoice must include description of service, costs and installation dates)

To Submit: Heating and Cooling Efficiency Program Incentive Application Worksheet (Based on system selected)

Customer Agreement

By signing below, I acknowledge that Idaho Power may visually inspect any installation or service performed in relation to the Heating and Cooling Efficiency Program. I hereby certify that all information on this application and required attachments is true and accurate. I have read, understood, and agreed to the terms and conditions located on the last page of this form and acknowledge that Idaho Power may verify all information provided. I acknowledge that this form is being sent to an Idaho Power third-party contractor for processing.

*Builder must sign in place of Homeowner, if the builder is the one applying for the New Construction Heat Pump incentive.

Customer Information and Agreement

Incentive Availability: Incentive qualifications and amounts are subject to change or termination at any time. Incentives offered by Idaho Power Company (Idaho Power) in the Heating and Cooling Efficiency Program (Program) will be processed on a first-come, first-served basis. Incentive qualifications are found on the incentive applications and worksheets online at www.IdahoPower.com/heatingcooling.

NOTE: heat pump and duct sealing incentives must be performed by an authorized contractor (Participating Contractor). Participating Contractors and additional program information can be found at www.IdahoPower.com/heatingcooling. Program continuation, eligibility requirements and terms and conditions apply.

Qualifying Applicants: Residential customers (Customer) of Idaho Power in Idaho and Oregon may qualify, as well as property owners and managers of rental properties served by Idaho Power.

Qualifying Equipment: All equipment/materials must be new and purchased and installed prior to submitting incentive paperwork.

Application and Worksheet Details: Application and worksheet submittals must include all information requested. Failure to provide this information may result in the delay or denial of the incentive. Idaho Power reserves the right to conduct random on-site inspections to verify information provided on the application. Incentive paperwork must be submitted within 90 days after project completion. Incentive amount not to exceed the price paid for the equipment and installation.

Idaho Power issues incentives in the form of checks and not utility bill credits. Idaho Power is not responsible if Participating Contractor or Licensed Contractor, who provides and installs the equipment, provides inaccurate information about the amount and/or conditions of the actual incentive. Idaho Power will not pay incentives for equipment that is mislabeled or misrepresented regarding incentive qualifications. Customer receiving incentives under the Program may not receive incentives for the same equipment under another Idaho Power program. Incentive amount not to exceed the price paid for the equipment and installation. Customer is responsible for complying with all applicable codes and regulations.

Incentive Limitations and Limitation of Damages: Payment of any incentive by Idaho Power does not guarantee the performance of qualifying measures and does not guarantee that the qualifying efficiency measures will deliver any specified amount of energy or cost savings. Customer shall independently evaluate any information related to the qualifying measure.

Neither Idaho Power, its parent company, affiliates, subsidiaries, directors, officers, employees, agents, representatives, successors and assigns, nor its contractors make any warranty, expressed or implied, or assume any liability or responsibility for the accuracy, completeness or usefulness of any information, estimated savings, benefits, products or processes, or service by trade name, trademark, manufacturer, or otherwise does not necessarily constitute or imply its endorsement, recommendation, or favoring by Idaho Power, its parent company, affiliates, subsidiaries, officers, employees, or its contractors.

Idaho Power makes no representation of warranty, and assumes no liability with respect to the quality, safety, performance, or other aspect of any design, system or appliance installed pursuant to the Program, and expressly disclaims any such representation, warranty or liability. Customer agrees to indemnify, defend, reimburse and hold harmless Idaho Power its parent company, affiliates, subsidiaries, directors, officers, employees, agents, representatives, successors and assigns of each, from, for and against any claims, demands, losses, damages, expense, and liabilities of any kind incurred by third parties arising out of, or relating to any measures installed.

Incentive Qualifications

Visit www.IdahoPower.com/heatingcooling for additional requirements.

Ducted Air Source Heat Pump - Existing Homes and New Construction: Qualifying existing home systems include air-source heat pump, electric forced air, oil or propane forced air, electric baseboard, electric ceiling cable, or electric wall units. There is a maximum of two incentives for two systems per home.

Qualifying homes include single-family built on-site, manufactured, duplex, triplex, and fourplex homes. They can be a primary residence, vacation home, or rental. If new construction or if the home is existing and the system being replaced is oil or propane forced-air furnace, the home qualifies only if natural gas is not available. If an existing system is being replaced and is electric forced air, any supplemental heat in the new heat pump must be electric.

Ductless Air Source Heat Pump - Existing Homes: Qualifying existing home systems include electric baseboard, electric ceiling cable, or electric wall units. There is a maximum of one incentive per home. Qualifying homes include single-family built on-site, manufactured, duplex, triplex, and fourplex homes. They can be a primary residence, vacation home, or rental.

Water Source Heat Pump - Existing Homes and New Construction: Qualifying existing home systems include air source heat pump, electric forced air, oil or propane forced air, electric baseboard, electric ceiling cable, or electric wall units. There is a maximum of one incentive per home.

Qualifying homes include single-family built on-site, manufactured, duplex, triplex, and fourplex homes. They can be a primary residence, vacation home, or rental. If new construction or if the home is existing and the system being replaced is oil or propane forced air furnace, home qualifies only if natural gas is not available. If existing system being replaced is electric forced air, any supplemental heat in the new heat pump must be electric.

Evaporative Cooler - Existing Homes: The minimum airflow rating is 2,500 cubic feet per minute (CFM). There is a maximum of one incentive per home. Home must be single-family built on-site, multi unit building with 4 or fewer units, or a manufactured home. It can be a primary residence, vacation home or rental.

Single Family Home Duct Sealing - Existing Homes: There is a maximum of one incentive per home. Homes must have electric forced-air heat (with or without central air conditioning) or a heat pump. Homes must be single-family and built on-site. Qualifying homes include primary residences, vacation homes and rentals.

Residential Whole House Fan - Existing Homes: There is a maximum of one incentive per home. Qualifying homes include homes with central air conditioning, zonal cooling or a heat pump. They must be single-family built on-site and can be a primary residence, vacation home or rental.

Electronically Commutated Air Handler Motor - Existing Homes: There is a maximum of one incentive per home. Qualifying heating systems (with or without central air conditioning) include electric resistance forced air heat, and oil or propane or natural gas forced-air heat. Heat pumps also qualify. Home must be single-family built on-site, multi unit building with 4 or fewer units, or a manufactured home. It can be a primary residence, vacation home or rental.

Smart Thermostat-Existing Homes: There is a maximum of one incentive per home. Homes must have electric forced air heat (with or without central air conditioning) or a heat pump. Homes must be single-family built on-site. Qualifying homes include primary residence, vacation homes and rentals.

Heat Pump Water Heater - Existing Homes: Existing homes must be replacing an existing electric storage water heater. There is a maximum of one incentive per home. Qualifying homes must be single-family built on site, manufactured, duplex, triplex, or fourplex. They can be primary residence, vacation home or rental.
