

Idaho Power is again offering the Irrigation Peak Rewards Program for the irrigation season. Receive a financial incentive for allowing Idaho Power to remotely turn off your irrigation pumps on a few specific hours when summer demand for energy is high.

The program operates from June 15 to August 15.

How to Participate

Load-Control Options

Automatic Load-Control Option

Idaho Power installs and operates a load control device(s) which provides the ability to send a signal that controls the associated irrigation pump(s) automatically. Pumps at service points that currently have a device installed are eligible to participate.

Manual Load-Control Option

Service points with at least 1,000 cumulative HP or that have limited communication availability are eligible for the Manual Dispatch Options. Customers under this classification choose to manually control which pumps are turned off during a Load Control Event.

Program Parameters

- Participants receive a financial incentive including a demand credit and a kWh credit.
- A minimum of three load control events will occur each program season for no more than four hours each.
- For more than three events Idaho Power will pay an additional incentive per hour (variable incentive)
- Load Control Events can occur any weekday or Saturday between the hours of 1 PM and 9 PM*
- Load Control Events could occur up to 15 hours per week, not to exceed more than 60 hours per program season.
- Idaho Power will notify you and other designated people via phone, text message and/or email according to your preferences.
- Although not always possible, Idaho Power will provide notification four hours before each event for Automatic Load Control participants.
- Idaho Power will provide notification four hours before each event for Manual Dispatch Option.
- Idaho Power will provide a 30 minute notification prior to the end of all control events.

*excluding July 4 holiday

Note: There are two indicator lights on the load-control device

RED LIGHT — Idaho Power is conducting a load-control event. Resetting the main breaker will result in an Opt-Out and be subject to the penalty fee.

GREEN LIGHT – The load-control device is in its normal operating condition and no load-control events are occurring.

Load-Control Incentives

Fixed-Incentive Payment		Variable-Incentive Payment After Three Events	
Demand Credit (\$ per billing kW)	Energy Credit (\$ per billing kilowatt-hour [kWh])	Standard Interruption Variable Energy Credit — four hours between 1p.m. – 8 p.m. (\$ per event kWh)	Extended Interruption Variable Energy Credit — four hours between 1p.m9 p.m. (\$ per event kWh)
\$5.00 aı	nd \$0.0076	\$0.148	r \$0.198

If there are more than three events, the variable-incentive credit will be calculated and mailed in the form of a check within 45 days from the end of the program season and will only be applied to events following the first three.

Customer Opt-Out

- Participants can opt-out of a load-control event up to five times per season per service point any time during or prior to an event.
- Each opt-out incurs a fee of \$5.00 per kW based on the current month's total billing kW for the first three events (the penalty for manual load-control service points would apply to nominated kW that was not turned off during an event). Any additional opt-outs will incur a fee of \$1.00 per kW. Opt-out fees will not exceed the total incentive received for the season.
- Customers who discontinue participation in the program during June 15 to August 15 will incur a fee of \$500 for each service point removed and may not re-enroll the service points until the following year.

Questions? Call us.

If you experience problems with load-control devices interfering with normal pump operation, or a device is in need of repair, contact your local Idaho Power agricultural representative (contact information is listed on the back).

For More Information

For more information on this program visit **idahopower.com/irrigation**. Idaho Power agricultural representatives are available throughout our service area to answer your questions and provide information.
