

Birding Checklist

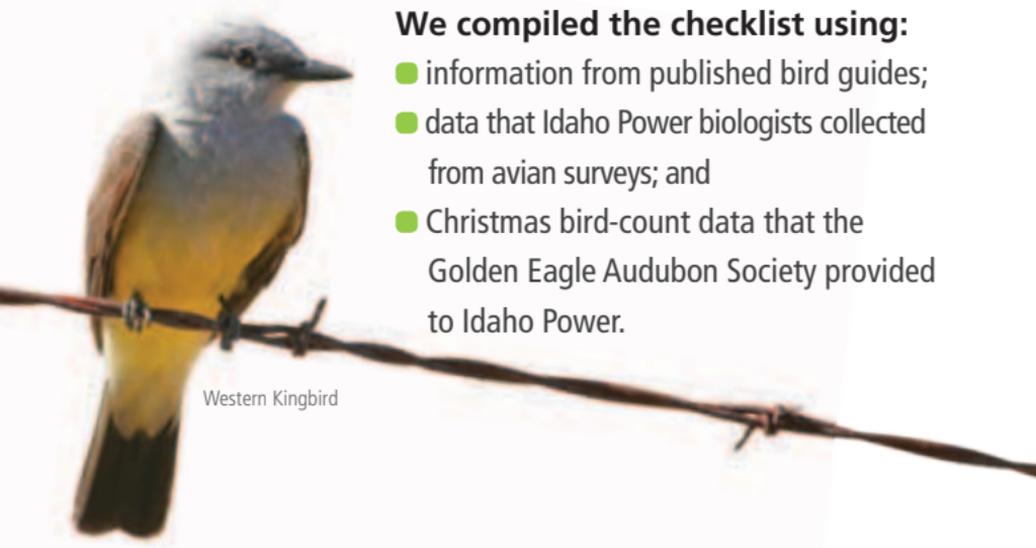

C.J. Strike

Bird-Watcher's Checklist For C.J. Strike Area

Welcome to C.J. Strike Wildlife Management Area (WMA). These publicly accessible lands are set aside for multipurpose recreational uses. They are managed by Idaho Power and the Idaho Department of Fish and Game to provide and enhance habitat for game and nongame wildlife. At C.J. Strike WMA, you will experience the important ways in which Idaho Power manages wildlife habitat, cares for the environment, and partners with you.

Whether you're new to bird watching or a veteran of many seasons in the field, this checklist will be a useful tool during your visit to C.J. Strike Wildlife Management Area. The checklist notes which birds are most likely to be observed during the year's seasons and in which habitats.

Western Kingbird

We compiled the checklist using:

- information from published bird guides;
- data that Idaho Power biologists collected from avian surveys; and
- Christmas bird-count data that the Golden Eagle Audubon Society provided to Idaho Power.

Balancing Recreation And Resources

We are committed to responsible environmental stewardship and to providing quality outdoor-recreation opportunities for anglers, hunters, campers and birding enthusiasts like you. Balanced management of more than 3,300 of the WMA's 13,508 acres is an obligation of our current federal license, issued in 2004, to operate the C.J. Strike Hydroelectric Project.

To accomplish these important goals, we are enhancing riparian areas and planting wildlife "shelter belts." We've improved and added recreational access points, day-use areas and camping facilities. About 40 acres of agricultural food plots are cultivated and managed for the benefit of wildlife and upland game-bird hunters. We have implemented these management activities to provide habitat to game and nongame birds and other wildlife at C.J. Strike Wildlife Management Area, and to help assure that visitors like you have a rewarding and memorable experience.

C.J. Strike Wildlife Management Area includes Idaho Power's C.J. Strike Reservoir and associated Idaho Power-owned lands, overlapping parts of the Morley Nelson Snake River Birds of Prey National Conservation Area, other state and federal lands and the Snake River. The Morley Nelson Snake River Birds of Prey Area provides opportunities to observe a variety of raptors, especially in spring and fall.

Access

Various graveled roads lead to the reservoir from state Route 78, along the south side of the reservoir, and provide access to viewing areas.

Birds You'll See

Waterfowl concentrate at C.J. Strike WMA in fall and winter. There are two particularly popular viewing locales at the dam, which is located at the west end of the reservoir. One is the spillway below the dam; the other is the park on the north side of the dam.

Diving ducks can be seen at the spillway. Bufflehead, common goldeneye, and the common merganser are regulars here. Red-breasted merganser, hooded merganser and Barrow's goldeneye are rarer. Waterfowl can be seen, often up close, at the reservoir's shallow east end.

Shorebirds may be found in early fall at the access provided by Jack's Creek Road. Access points on the north and south sides of the river at Loveridge Bridge, as well as the overlook at the Bruneau duck ponds, provide opportunities to watch shorebirds in spring and summer. American avocet, black-necked stilts, greater and lesser yellowlegs, great egrets and cattle egrets also are seen regularly in the Loveridge Bridge and Bruneau Duck Ponds areas.

Neo-tropical migrant songbirds can be seen and heard in riparian habitat at Idaho Power's Turner Ranch and Bruneau Floodplain properties. Both have access points. Spotted sandpipers are regulars on the Bruneau River shoreline. These areas are open to walk-in access from Aug. 1 through Jan. 31.

Closures

Most Idaho Power land at C.J. Strike Wildlife Management Area is open to the public for recreational use. Some areas are closed to the public for safety reasons. Other areas are closed seasonally, from Feb. 1 through July 31. The closures help us protect nesting waterfowl

and upland game birds. With these goals in mind, we ask visitors to comply with signs that mark the boundaries of closed areas.

Please be aware that hunters regularly use this area from late September through Jan. 31.

Since its earliest days, Idaho Power has embraced the philosophy of operating its projects for public benefit. We appreciate the trust the public has granted, and we recognize the important role we play as one of the many stewards of Idaho's natural resources.

To learn more about the recreational opportunities we provide, and Idaho Power's initiatives to protect our natural and cultural heritage, visit "Our Environment" online at:

Western Tanager

Birding Etiquette

- Stay on designated roads and trails
- Obey all laws, including those that apply to roads, trails and the rights of others
- Respect private property
- Be courteous to others
- Keep groups small (4-8 people)
- Minimize stress on birds by keeping your distance while viewing, photographing or filming
- Stay back from nests and display areas
